Create a webpage with the following features in HTML:

a. Print your name using appropriate header in red color, address using address tag, use a link of your linkedin or facebook and marquee tag to display the mobile number
b. Place your photo of size 100x100 to a right side of the page with a caption to the figure
c. Create a horizontal rule
d. Create a section tag called "About me" to describe about yourself in a paragraph format, use acronym tag to mention the theoretical area of interests in bold bulleted text and technical languages known in emphasized italic bulleted text (Do not use UL tag here) in one by one in separate line
e. Set the background color of the page as yellow
f. Write a comment line on your code and make sure it is not displayed in the page
g. Use "details", "summary" and "p" tags to give a summary note of yourself and highlight using appropriate tag to specify your significant achievement

```html
<!DOCTYPE html>
<html>
<head>
<title>My Webpage</title>
</head>
<body bgcolor="yellow">

<h1><font color="red">Aranyak Banerjee</font></h1>
<address>
  VIT Chennai <br>
</address>
  <a href="https://www.linkedin.com/in/your-linkedin-id">LinkedIn</a> <br>
  <marquee>Mobile Number: 8240614971</marquee>

<figure align="right">
  <img src="your_photo.jpg" alt="My Photo" width="100" height="100">
  <figcaption>This is me!</figcaption>
</figure>

<hr>

<section>
  <h2>About Me</h2>
```

```
  <p>

Hey there! I'm Aranyak, a second-year computer science student at VIT Chennai.
When I'm not diving into the fascinating world of code and algorithms, you'll
find me rocking out to music, crushing levels in video games, or battling it
out on the football and tennis courts. Life's a mix of ones and zeros, epic
tunes, and the rush of competition, and I wouldn't have it any other way!

Feel free to ask me anything, whether it's about the latest programming
language, the hottest new band, or my killer drop shot!
  </p>
  <p>
    Theoretical areas of interest:
    <br><b><acronym title="Artificial Intelligence">AI</acronym></b>
    <br><b><acronym title="Machine Learning">ML</acronym></b>
  </p>
  <p>
    Technical languages known:
    <br><i><em><acronym title="HTML">HTML</acronym></em></i>
    <br><i><em><acronym title="JAVASCRIPT">JavaScript</acronym></em></i>
  </p>
</section>

<details>
  <summary>Summary Note</summary>
  <!--This is me!!!!-->
  <p>

I'm a tech enthusiast with a passion for code and a brain wired for problem-
solving. DSA's my playground, new technologies are my daily discoveries, and
clear communication is my superpower. My days are filled with the thrill of
tackling challenges, crafting elegant solutions, and constantly pushing my own
boundaries in the ever-evolving world of tech. If you're looking for someone
who thrives on the intersection of logic and creativity, bring on the code and
let's build something awesome together!
  </p>
  <p>
    <mark>Significant Achievement:</mark>
    I and my team participated in a hackathon organized in the campus. We
initially came across a plethora of problems, but at the end we finished in
the top 30 teams in the college. We were unfortunate to miss out of the
finals, but this for me will be a significant achievement and a life-long
memory
